DECEMBER 2024

HeatPro® 5T MCHX Series

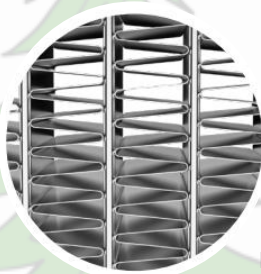

BETTER TEMPERATURE CONTROL BETTER CONSTRUCTION BETTER FOR EVERYONE

The new Hayward **HeatPro® 5T MCHX Series** of electric heat pumps utilize industry-first microchannel technology engineered to get your pool water to the perfect temperature.

The **5T MCHX Series** warms the water to extend the swim season, cools the water to a refreshing temperature during periods of warm weather and even chills down to 40°F, making it perfect for therapeutic cold plunges.

The robust coil structure of the **5T MCHX** protects against fin damage from impacts during installation and transportation and there is less degradation versus the tube and fin construction.

An 85% reduction in braze joints of the **5T MCHX Series** means less leak opportunities and the TCP coating developed by the US Naval Air Command provides durability in the harshest climates.

Robust Coil Structure

85% fewer braze joints

Overall weight reduction and use of less R-410 A refrigerant in the **5T MCHX Series** make the heater more eco-friendly to help reduce your carbon footprint and lower your energy expenses.

AHRI Certified and proudly built in the USA, the industry-best **HeatPro® 5T MCHX Series** gets even better when you pair it with top-rated Omni automation—offering advanced management of temperature and runtime.

Hayward IMG will implement a price action **December 1, 2024**. The price increase is expected for most items. These increases are necessary to keep pace with escalating costs of both raw materials and labor. Hayward will evaluate and adjust pricing to best reflect market conditions.

Check with your Hayward representative or your distributor for any special programs that may help mitigate the effects of the price action.

ProGrid™ DE Filters - For BETTER Water Clarity

Hayward® ProGrid™ vertical grid D.E. filters offer superior large-capacity performance for pools and spas of all types and sizes.

They're constructed of a durable, glass-reinforced copolymer for corrosion-free durability, and their service-ease assembly makes accessing internal parts simple.

Engineered with branded high-impact grid elements, they provide up-flow filtration and top-down backwashing for maximum efficiency.

A heavy-duty, tamper-proof, one-piece clamp provides quick access to internal components without disturbing plumbing connections.

SP0425-SelectaFlo™
High-Efficiency Valve

4 or 6-Position
Multiport Valve

Available with different multiport valve options.

Saline C® Series - High-Capacity Salt Chlorination Systems

Saline C 6.0

Hayward Saline C® Series NSF certified salt chlorine generators are designed to produce up to 11 lbs. of chlorine per day.

They feature a compact design in a single clear vessel with a single heavy duty power supply, eliminating the need for daisy chaining multiple cells.

This more efficient design lowers installation costs and consumes less space.

Saline C 11.0

Designed to meet the needs of commercial applications that benefit by the operation of a salt-chlorinated pool and lowering sanitization costs.

The Saline C 6.0 and Saline C 11.0 when installed with the CAT 5500® become an advanced automated water quality solution.

CAT 5500 Pro Package

Connect with **PoolComm®** to enjoy effortless remote monitoring (now including conductivity/NaCl) and audit tracking.
