

## SKIMMASTER® Series

High-Quality Skimmer Design  
Delivers Superior Reliability

The **Hayward® SKIMMASTER®** in-ground pool skimmers are manufactured to rigorous quality standards. Their durable, unibody construction is molded of rugged ABS material for all-weather performance,

and each skimmer is offered with multiple plumbing connections for simple installation. Non-corrosive, non-conductive and virtually indestructible, they're the preferred choice of professional pool builders.

### The SKIMMASTER® SP1072S2

Skimmer boasts one of the highest flow ratings in the industry at 75 GPM.

## Perflex® Regenerative DE Filters

**Hayward Perflex®** Regenerative filters are extended-cycle D.E. filters that clean pools fast, removing particles as small as one micron the first time through.

The patented **Flex-Tube™** design gives longer cycles between cleaning because the same D.E. filter powder is used over and over.

Flex-Tube™

Exclusive bump handle activates the mechanism causing the Flex-Tubes to instantly and uniformly clean themselves of dirt and filter powder to form a fresh filtering surface and the self-venting design automatically expels any air that may be present in the system

**Perflex®** cleans without backwashing, saving hundreds of gallons of treated pool water.

EC60A

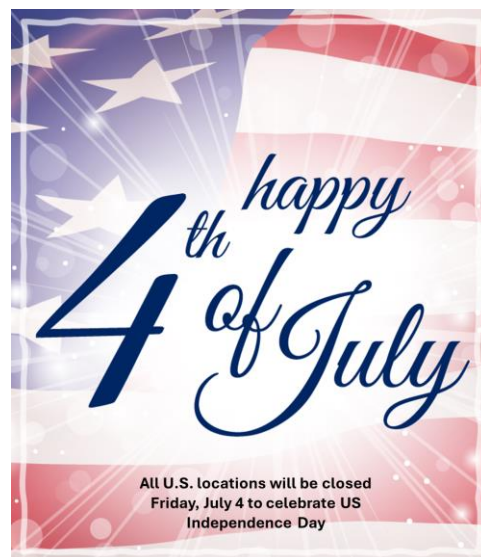

Heavy-duty filter tank injection-molded of high-strength thermoplastic for dependable, corrosion-free performance.

The **Perflex®** Filter is available in multiple sizes and in a compact system in combination with the EC65BLP platform and a Hayward pump.

EC75A with Super Pump

All U.S. locations will be closed  
Friday, July 4 to celebrate US  
Independence Day

## Electric Pool & Spa Heaters

Coates has been the trusted name for quality and reliability of electric pool water heating equipment since the 1940s and continues to lead the industry in performance. IMG is one of the international distributors for Coates Heaters.

The export model heaters are available from 12kW to 180kW and most can be ordered in single or three phase models.

These medium capacity pool and spa heaters feature a built-in flow switch to prevent operation when there is no water flow.

Heaters for high-capacity commercial pool installations, available up to 300kW, incorporate design features that increase service life, dependability and provide ease of servicing.

Corrosion resistant all stainless steel tank surfaces and low watt density Incoloy elements provide long, trouble-free service life.

Coates heaters are made in the US and can be consolidated with Hayward US shipments.

**ChlorKing® Sentry AquaGuard (SAG)** ultraviolet systems are designed for commercial pools and spas and pay for themselves through lower cost of operation and durability.

**Sentry AquaGuard (SAG)** ultraviolet light systems add a second level of protection against pathogens in the pool water. Their unique design employs high output amalgam technology with 254nm wavelength for sterilization and 185nm wavelength for oxidation for better chloramine control and inactivation of chlorine resistant bacteria.

**Sentry AquaGuard UV (SAG)** systems can be installed vertically or horizontally and will fit into most existing pump rooms.

**Sentry AquaGuard UV (SAG)** systems feature a patent pending quick disconnect sleeve assembly for the easiest quartz sleeve removal in the industry. This unique design allows the operator to remove the sleeves in less

Quick-disconnect sleeve for easy maintenance

than 1 minute when changing, cleaning or replacing is required.

A LED control panel allows the operator to visually inspect operation and will warn of any malfunction or situation that needs attention.

Available in multiple capacities with both plastic and stainless steel outer bodies and flange sizes from 2" to 10" inlet and outlet options for flow rates up to 1140 gpm.
